

Academic Year 2019 - 2020	Total Fund Allocated - £16,880					
Primary PE & Sport Premium Key Outcome Indicator	School Focus/ planned Impact on pupils	Actions to Achieve	Planned Funding	Evidence	Actual Impact (following Review) on pupils	Sustainability/ Next Steps
Physical Education						
For all teaching staff to feel confident in teaching all areas of physical activity.	For teachers to be able to stretch all abilities in PE, including greater depth.	Identify areas that teachers are less confident in teaching and find courses for them.	£1000	Teaching staff of year 2 and year 3 were able to attend forest school at the John Lowther centre, alongside leaders from the centre itself. This allowed them to work alongside the leaders to deliver OAA sessions to the children. This supported them in becoming more confident at teaching and also gave ideas of what they could do for OAA at school.	Huge impact. Teaching staff feel confident in teaching OAA sessions. Children were able to go to the John Lowther centre and experience activities they hadn't done before. These activities included physical challenges, as well as wellbeing activities and survival skills.	Due to being granted the sports premium again next year, we wish to continue to attend these sessions at the John Lowther centre. We hope that over the course of the year, all year groups will have a chance to go, meaning all teaching staff will too. Teaching staff are to work alongside scouts leaders.
Formal Activity						
To increase the amount of club participators.	Children will be able to take part in clubs due to them being free. The children will have had training on skills which will get them ready to take part in festivals and competitions.	Sports teachers to hold clubs. Type of club will be chosen due to upcoming events.	£2000	This year, a total of 15 girls and 57 boys attended our clubs. Some of these were attendees of the free clubs we offered on a Tuesday, before and after school.	Many children attended the clubs and after speaking to them, showed they really enjoyed them. We offered a range of clubs, that focused on different skills, therefore the children had a variety of choice. Some children attended more than one club, meaning they were	This is sustainable for next year, and we will be able to offer the free clubs again on a Tuesday. My next steps are to have children and parents fill out a questionnaire to find information about why their child does or does not attend clubs already, what clubs they'd like to see. The aim next year will be to

					working on improving their skills in more than one area.	increase participation, which for us, would be to focus on girls and why very little have attended clubs this year.
Informal Activity						
<p>To ensure early years have opportunities for active play to happen in their outside classroom.</p> <p>To ensure playground equipment in maintained to encourage children to stay active.</p>	<p>Children using different skill sets due to new equipment.</p> <p>Maintaining the amount of children being active at break times.</p>	<p>To update and improve the outside area in the Reception and Year 1 classroom.</p> <p>To renew the football goal posts on the AstroTurf.</p>	£6000	<p>Reception and Year 1 outside area has been completed re-done. The outdoor area was becoming unsafe for the children to be in, which would have massively impacted the children's foundation skills in PE.</p> <p>New goals were put up on the astro-turf.</p>	<p>The Reception and Year 1 children can now continue to have their outside classroom as well as their inside classroom. This is where they are able to practise skills such as team work, spatial awareness, motor skills, co-ordination and control, balancing skills and many more. This is vital for these individuals.</p> <p>Football is the most popular sport in our school and although we encourage the children to play other games, we recognise that allowing the children to play football means many children are extremely active during their break times.</p>	<p>This will now continue to be a place for the children to use to practise all these skills. The next step will be to ensure the children have access to equipment to work on all of these skills regularly.</p> <p>The goals are strong and will not need to be replaced for many years. Next steps are just to continue to look after them and not misuse them. I will also look at what other games we can introduce and play, using the goals.</p>
Active Transport						

Allow children to have an equal chance of attending events.	Children that do not have a way of transport to events will be able to take part.	Offer a bus to certain events over the year.	£600	We attended 'during school time' events this year which we were able to transport the children to. Note: some events were to take place that did not due to Covid-19.	Children had the opportunity to take part in events they haven't had the option to before due to joining KSSP. (Such as gymnastics comp)	To continue to use part of the premium for transport as this certainly opens up the opportunity to attend the event to some children who wouldn't usually come.
Health and Wellbeing						
For children to increase their existing knowledge of their own health and wellbeing, and the health and wellbeing of others.	For children to understand how to look after themselves properly. Eg. Brushing teeth and healthy diets.	Finding fitness to come into school to teach all ages, age appropriate wellbeing sessions.	£5990	Finding Fitness delivered well-being sessions to the whole school over the course of the year. Note: due to Covid-19, some year group did not have this, although the sessions continued for the children that were in school.	Each year group received their age related well-being sessions. This stands alongside our PSHE and the children benefit greatly from it. Focusing on a wide range of topics from friendships to physical health.	Continue to have well-being sessions next year. This will be essential due to the children being away from school for so long. Many will feel anxious about coming back to school and these sessions will support these emotions.
Equipment						
For children to be able to practise skills that they feel less confident with.	For all children to have an equal chance at finding a sport they enjoy.	To purchase a range of sports equipment to allow children to have a go at sports they might not have previously.	£1300	New PE equipment was bought throughout the year.	Children were able to practise skills and had a wide range of choice of activity in PE lessons as well as break times and during clubs.	Due to Covid-19, a large order of PE equipment was not made. This will be made for next year as we can carry the money over.

Due to Covid-19, there will be some money that we will carry over to next year. The total amount of money we will carry over to next year is:
